# Photoelectrics, ATEX Level Sensors Type EBVP, Unmodulated

- Sensor for liquid level detection
- Built-in amplifier, Ga-As diode
- Output: Transistor PNP, NO or NC
- · High chemical resistance to most acids and bases
- EBVP01/03: Output OFF when sensor in liquid
- EBVP02/04: Output ON when sensor in liquid
- No electrical or thermal connection between liquid and electrical circuit
- LED-indication for output ON
- Power supply: 10 to 40 VDC
- ATEX zone 1

## **Product Description**

Optical level sensor with unmodulated, infrared light for the detection of liquids. Fitted with built-in amplifier. Transmitter and receiver are completely self-contained in solid plastic housing designed for mounting into container wall. VP01/02 are available in a Polysulphone housing resistant to most acids and bases. VP03/04 are available in a Polyamide 12 housing resistant to various solvents. For ATEX zone 1 where explosive atmosphere not likely to be present

Ordering Key	EBVP 0 3 E P AX
Type

## **Type Selection**

Housing material	Ordering no. Transistor PNP Make switching	Ordering no. Transistor PNP Break switching
Polysulphone	EBVP 02 EP AX	EBVP 01 EP AX
Polyamide 12	EBVP 04 EP AX	EBVP 03 EP AX

# **Specifications**

Rated operational voltage	10 - 16.8 VDC	Indication for output st
Rated operational current Continuous	< 50 mA	Housing and tip materi VP01/02
Voltage drop	≤ 1.0 VDC	VP03/04
No-load supply current	≤ 12 mA	Weight
Sensing accuracy Liquid level difference	Horizontal mounting: ± 5 mm Vertical mounting: ± 2.5 mm	Connection Pressure
Ambient light	0 - 100 lux	Pipe thread
Frequency of operating cycles (f)	30 Hz	Approvals
Environment Degree of protection Operating temperature Storage temperature	IP 67 -20 to +80°C (-4 to +176°F) -40 to +100°C (-40 to + 100°F)	CE-marking TÜV Approval

Indication for output status	LED, yellow
Housing and tip material VP01/02 VP03/04	Polysulphone Polyamide 12
Weight	90 g
Connection	Cable (PVC), 2 m Ø4,1 mm, 3 x 0,25 mm2
Pressure	10 bar at + 60°C
Pipe thread	3/8" PT
Approvals	$\langle E_{22} \rangle$ II 2G EEx iB IIb T6 IP67 Ci < 1.2 $\mu$ F Li < 2.5 mH
CE-marking	Yes
TÜV Approval	Yes

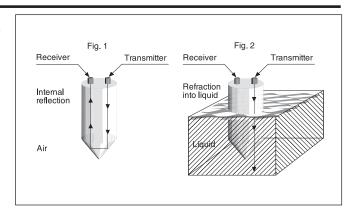

## **Mode of Operation**

The sensor contains IR transmitter, receiver and amplifier with transistor or SCR output. The light source is a Ga-As diode emitting infrared light.

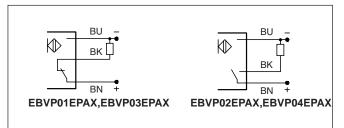

The conical tip of the sensor forms an angle of 90°C. This angle acts as a prism, i.e. the beam, emitted from the Ga-As diode placed in one side of the sensor head, is reflected internally to the phototransistor placed in the other side of the sensor head, provided

that the tip of the sensor is situated in free air. If the sensor tip is immersed in a liquid, always having a refractive index different from air, the beam will not be refracted by the prism and the photo transistor will not receive any signal.

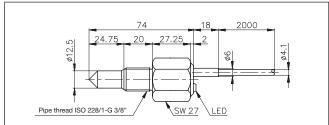

The sensor types can operate in oil, waste water, aqueous solutions such as beer, wine, alcohol etc. without any kind of accessory.
