

# Calibration via button

## Upgrade of the LEVELTEC

## Upgrade of the LEVELTEC:

From now on the series LEVELTEC will be equipped with new electronics containing a TeachIn-button

### ► Your benefits

- faster configuration by simplified calibration
- optimal sensitivity setting to the media
- safer handling
- functionality is fully retained

### ► Level switching in difficult measurements

- **LEVELTEC S** for liquid, conductive and non-conductive media
- **LEVELTEC LR** for safe pump protection in pipes
- **LEVELTEC L** with inactive extension, for min-detection of pasty and adhesive products in tanks
- **LEVELTEC V** with stick electrode, for max-detection of pasty and adhesive products in tanks
