

→ Series 355bHL

355bHL

Safety valves made of spheroidal graphite cast iron, angle-type with flange connections

■ SUITABLE FOR

Hot water

■ EXAMPLES OF USE

Full-lift safety valve for the protection of:

- thermostatically protected closed-circuit water heating systems with flow temperatures of up to 120°C for all static heights or rated output above 350 kW according to TRD 721, DIN 4751 and DIN EN 12828.

Should the thermostatic limiting and control unit fail, the safety valve has to blow-off the total heating output of the boiler as hot water and steam. As these valves are completely made of metal, they can also be installed at high environmental or radiation temperatures.

- heating systems for building technology and industrial applications
- co-generation plants (CHP)
- biogas plants
- district heating transfer stations, building sub-stations

■ CHARACTERISTICS

- maintenance-friendly construction
- replaceable seat
- Replaceable flat seal
- freely rotatable spindle-taper connection
- full metal design for high ambient or radiation temperatures
- extensive range of spare parts, see spare parts flange safety valves
- vertical and horizontal installation position possible

Safety valves are set and sealed at the factory.

■ APPROVALS

TÜV Type test approval 2094 D/G/H

EU type examination D/G/H

TR ZU 032/2013 - TR ZU 010/2011 D/G/H

Requirements

TRD 721
AGFW 505
DIN 4751 Part 2
DIN EN 12828
DIN EN ISO 4126-1
PED 2014/68/EU
UK PESR 2016 No. 1105

■ MATERIAL

■ SPECIFICATION

DN 15 to DN 100 – 10°C to + 120°C 0,5 – 25 bar depending on version

■ MATERIALS

Component	Material	DIN EN	ASME
Inlet body	Spheroidal graphite cast iron	5.3103	Gr. 60-40-18
Valve seat	Stainless steel	1.4404	316 L
Internal parts	Steel	1.4021/1.4104/1.4122	420/430F/1.4122
Spring	Steel	1.8159 / FDSiCr	
Bellows	Elastomere	EPDM	

b	with bellows	for neutral and non-neutral media without counter pressure. Spring, moving parts and the environment are protected from being affected by the medium.
----------	--------------	---

■ MEDIUM

H	Hot water	Flow temperature ≤ 120°C in water heating systems
----------	-----------	---

■ TYPE OF LIFTING MECHANISM

L	Standard with lifting lever
----------	-----------------------------

■ AVAILABLE NOMINAL DIAMETERS AND CONNECTION SIZES

In order to achieve the highest possible heating output, up to three valves per system can be installed.

To protect indirectly heated heat generators in accordance with DIN 4751 Part 2 the safety valves have to be rated for the flow rate of the expansion water. For the valid blow-off capacities in m³/h water see capacity chart **355 on datasheet 2.03**.
