

Ebor

Flow sight glass PN 10 to 40 - DIN 3237

With flange connections according to DIN 1092-1

Type 550

APPLICATION:

For observation of filling and flow in pipelines. This sight glass allows reliable monitoring of the function and performance of individual equipment as well as entire installations.

Type 550 flow sight glasses are suitable for mounting on flanges according to DIN EN 1092-1. The sight glasses are supplied pre-assembled and ready for installation.

INSTALLATION NOTE:

Gaskets suitable for the sealing surfaces should be used. The screw material should be equivalent to or higher than those of the sight glass body. Always use screws that match the hole pattern. If possible, the screw thread and the screw head should be lubricated.

According to DIN 3237 with flange connections according to DIN 1092-1 ($\Delta P \leq 10 / 16 / 25 / 40$ bar)

Operating conditions:

Temperature: (depending on glass and gasket)	150 °C 280 °C
Pressure:	≤ 10 / 16 / 25 / 40 Bar

Materials:

Body:	GG25; GS-C 25; 1.4408
Glass:	Borosilicate glass DIN 7080 Soda lime glass DIN 8902
Gasket:	PTFE; FKM; NBR; C4400; Silicone; EPDM; Graphite
Screws:	A4-70
Special materials on request	

DESIGN:

DN15 - 50 Square flange version
(see illustration)
DN65 - 200 Round flange version

Ebor

Flow sight glass PN 10 to 40 - DIN 3237

With flange connections according to DIN 1092-1

Type 550

VARIANTS:

ROTOR PLASTIC (120°C) OR PTFE (260°C):

A liquid flow is indicated through rotation of the rotor. As a result, flow control is much easier and quicker to detect.

FLAP MADE OF 1.4571:

A liquid flow is indicated by opening and moving the flap. In this way it is easier and quicker to check the flow rate.

VACUUM VERSION WITH O-RING:

In the case of vacuum, there is a risk whereby the gasket can be pulled inwards and the external medium can enter the valve. For medium vacuum, a PTFE seal should be used, for higher vacuum, an O-ring seal made of Viton is required.

DOUBLE GLAZING:

Double glazing ensures additional safety in the case of damage to the inner glass. The additional glass prevents distribution of medium and possible glass splinters in case of damage or even destruction of the inner glass.

INFO: Unless otherwise stated, the factory standard highlighted is supplied.

* Cover flanges made of body material or according to quotation / order confirmation

SPECIAL DESIGNS/OPTIONS:

- a) Rotor made of PTFE or plastic
- b) Flap made of 1.4571
- c) Vacuum version with O-ring
- d) double glazing
- e) LED or halogen lights, ATEX-certified, EX certified
- f) Other options on request

EXAMPLE:

11-550-10-1-3-1-7-1 equals the product code:

ACI Type 550
DN 125
PN 10
body 1.4408
borosilicate glass
gasket graphite
with PTFE rotor

ATTENTION!

The pressure-temperature limits according to DIN EN 1092-1 apply!

Our tool of the same name is available on our website for this purpose.

RECOMMENDATION:

For aggressive media or steam, mica discs should be used to protect the glass.
